ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Our records come from both barrier islands and other tidewater areas where Southern Red Cedars are common, as well as inland sites where Eastern Red Cedar is the likely host plant

FOOD: Larvae feed on Eastern Red Cedar (<i>Juniperus virginiana</i>) (Forbes, 1923; Beadle & Leckie, 2018). We do not have any feeding records in North Carolina.
