## Condylolomia participialis Drab Condylolomia

FIELD GUIDE DESCRIPTIONS: Covell (1984); Beadle and Leckie (2012) ONLINE PHOTOS: TECHNICAL DESCRIPTION, ADULTS: TECHNICAL DESCRIPTION, IMMATURE STAGES:

ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: We have records from a wide variety of habitats, including Northern Hardwood and Spruce-Fir Forests, high elevation grasslands, mountain bogs and alluvial forests, and residential areas in the Piedmont

FOOD: Larval host plants include members of the Myricaceae (Covell, 1984).  $\langle i \rangle$ Myrica gale $\langle /i \rangle$  is specifically mentioned by BugGuide (accessed 2020-10-29). In North Carolina, however,  $\langle i \rangle$ M. gale $\langle /i \rangle$  is extremely rare and bayberries and wax myrtles occur mainly in the Coastal Plain where this moth appears to be scarce or absent.

**OBSERVATION METHODS:** 

NATURAL HERITAGE PROGRAM RANKS: GNR SU

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
