ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Found in rich alluvial forests and bluffs along the Roanoke and Cape Fear Rivers; also in non-riverine swamp forest in the Outer Coastal Plain

FOOD: Feeds on Pawpaws (*Asimina* spp.) (Robinson et al., 2010). Our records come mainly from sites where Common Pawpaw occurs but larvae have been found feeding on Dwarf Pawpaw in Harnett County.

OBSERVATION_METHODS: Although we have captured up to six in a single trap, the lack of records for this species may indicate that it comes poorly to blacklights.

NATURAL HERITAGE PROGRAM RANKS: GNR S2S4

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
