

Bucculatrix unidentified species No common name

High counts of:
 3 - Durham - 2022-07-21
 2 - New Hanover - 2024-04-16
 1 - Guilford - 2019-10-21

● = Sighting or Collection in NC since 2006

Status	Rank
NC	US
NC	Global

Three periods to each month: 1-10 / 11-20 / 21-31

FAMILY: Bucculatricidae SUBFAMILY: [Bucculatricinae] TRIBE: [Bucculatricini]
 TAXONOMIC_COMMENTS: <i>Bucculatrix</i> is a large genus of small leaf-mining moths, with around 300 species worldwide. A total of 103 Nearctic species have been described, and many others will likely be described in the future. Braun (1963) covered 99 species in her monograph, and four additional Nearctic species have been described since then. We have several forms from North Carolina that are difficult to assign to currently recognized species.
