TECHNICAL DESCRIPTION, IMMATURE STAGES:

ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Our records come from maritime scrub and forest habitats, and swamp forests; blackberry does not seem likely as the common denominator for this particular range of habitats or the restriction of this species to the Coastal Plain.

FOOD: Larvae have been reared on blackberry (Wagner et al., 2001). There is a BugGuide record (George Smiley, 2014) for a larva on Supplejack (<i>Berchemia scandens</i>).

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G4 S3S4

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
