ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Our records come from high elevation hardwoods and Spruce-fir Forests, as well as cove forests and riparian forests. Some may also come from relatively dry hardwood sites.

FOOD: All members of this genus feed on ferns (Wagner et al., 2001), and *H. fritillaria* has specifically been reported to use Bracken Fern (*Pteridium aquilinum*) (Ferguson, 1975). There is an iNaturalist record (Melinda Fawver, 2024) for a larva feeding on an unknown fern species.

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G5 SNR [S3S5]

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
