TECHNICAL DESCRIPTION, ADULTS:

TECHNICAL DESCRIPTION, IMMATURE STAGES:

ID COMMENTS: Similar to refractaria but indeclinata but refractaria is slightly larger and the pm line is usually a good indicator. It comes to a real point where the angle breaks and the line up to the costa is longer. All in all it is a more tailored species with all the markings crisper (JBS, pers. obs.)

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.
