ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Probably originally confined to Tidewater habitats, where most of our records come from. However, it has also been recorded well into the Piedmont and Mountains, following the spread of its host plant along roadsides and other disturbed habitats.

FOOD: Larvae feed on Baccharis halimifolia (Robinson et al., 2010)

OBSERVATION\_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G4 S4

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
