ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: This species is associated with barrens and woodlands throughout its range (Wagner, 2005). North Carolina records come from dry maritime forests along the coast, dry monadnocks in the Piedmont, and ridgetops in the Mountains. At one site in the Piedmont, Bear Oak is a possible host plant.

FOOD: Larvae feed on oaks, especially Bear Oak northward (Wagner et al., 2011)

OBSERVATION\_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G4 S3

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
