ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Most of our records come from areas where Cottonwoods are common, including brownwater river floodplains in the Outer Coastal Plain. One record comes from a barrier island, where willows seem more likely to be the host, and one comes from a high elevation summit where Bigtooth Aspen is present.

FOOD: Larvae feed on poplars (Wagner, 2005). Other reported hosts require confirmation.

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G5 SNR [S2S4]

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
