ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Our records come from a wide range of habitats, with the majority from floodplains, shorelines, wet pine savannas, peatlands, swamps, and mesic hardwoods. Only a few come from drier habitats, including sandhills and dry slopes in the Piedmont and Mountains. Records are essentially missing from old fields, grasslands, and montane conifer forests.

FOOD: Larvae have been reported to feed on fungi (Covell, 1984; Robinson et al., 2010).

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G5 SNR [S5]

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
