ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Mikkola et al. (2009) mention that adults fly in deciduous woodlands. Our records come from a rich cove forest, a high elevation forest, an alluvial forest, and a stand of spruce located adjacent to an extensive mountain bog/pasture complex.

FOOD: Host plants are unknown, but members of this genus typically feed on grasses and sedges (Mikkola et al., 2009).

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G4 S2S3

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
