ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Our records come mainly from fairly open habitats -- including semi-rural residential areas.

FOOD: Larvae feed on dock (*Rumex* spp.) (Rockburne & Lafontaine, 1976). The most widespread species of dock in North Carolina are introduced species. In the Mountains, the only recorded native species is Pale Dock (*Rumex altissimus*).

OBSERVATION\_METHODS:

NATURAL HERITAGE PROGRAM RANKS: GNR SNR [S1S2]

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
