

Platypolia mactata Adorable Brocade Moth

FAMILY: Noctuidae SUBFAMILY: Noctuinae TRIBE: Xylenini

TAXONOMIC COMMENTS: Information based primarily on molecular data and/or genitalia indicate that the genus that this species currently is assigned to is misapplied, but the correct genus to which it should be assigned has not been determined by experts. The genus name is sometimes placed in quotation marks (<i>"Platypolia" mactata</i>) to indicate the misapplied name.

FIELD GUIDE DESCRIPTIONS: Beadle and Leckie (2012)

ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Wagner et al. (2011) list woodlands and forests, mostly on rich soils as habitats used by this species. We have records from cove forests, high elevation hardwoods, and montane alluvial forests. Piedmont records come from a high monadnock that supports a number of montane species.

FOOD: Larvae feed on woody plants, including Carolina Silverbell (Wagner et al., 2011). In captivity, they also feed on Cherry and Gray Birch.

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G5 S2S3

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
