ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Our two records come from riparian habitats in the Mountains

FOOD: Larvae feed on Reed Canarygrass (Wagner et al., 2011).

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: GNR S1S2

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS: This is a northern species with our records representing what appears to be a disjunct population, possibly reaching our area along the New River/Ohio River drainage. Its host plant, however, is widespread in the Mountains and the moth should be looked for in areas further to the south.
