ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: The majority of our records come from cove forests and high elevation forests. A few also come from high elevation grassy balds or semi-natural grasslands. One isolated specimen comes from a residential area in the western Piedmont.

FOOD: Larvae feed on grasses (Wagner et al., 2011). In North Carolina, our only feeding record is from an unknown rush (*Juncus* sp.).

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: G5 SNR [S3S4]

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS:
