ID COMMENTS:

DISTRIBUTION: Please refer to the dot map.

FLIGHT COMMENT: Please refer to the flight charts.

HABITAT: Most of our records come from residential areas, probably in association with Hops grown for home brewing. At least one record comes from a natural area with extensive non-riverine swamp forests, possibly indicating that other members of the Urticaceae can be used.

FOOD: Larvae feed on Hops (Wagner et al., 2011)

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: GNR SNA

STATE PROTECTION: Has no legal protection, although permits are required to collect it on state parks and other public lands.

COMMENTS: This species is an introduction from Asia
