

*Pseudopolydesmus paludicola* No common name

FAMILY: Polydesmidae SUBFAMILY: TRIBE:  
TAXONOMIC COMMENTS:

FIELD GUIDE DESCRIPTIONS:  
ONLINE PHOTOS:

ID COMMENTS: *P. paludicola* is much smaller than the other species of *Pseudopolydesmus* that we have in NC, with an adult male body length of only 11-13 mm.

DISTRIBUTION: Its distribution is not well known. It has been recorded in VA and SC, but this is the first record for NC.

HABITAT: It seems to prefer swamps and wetland areas. Lives in moist leaf litter.
