

Sigmoria watauga No common name

FAMILY: Xystodesmidae SUBFAMILY: TRIBE:
TAXONOMIC_COMMENTS:

FIELD GUIDE DESCRIPTIONS:
ONLINE PHOTOS:

ID COMMENTS:

DISTRIBUTION: This species appears to be endemic to North Carolina and is nearly confined to Watauga County (Shelley and Whitehead, 1986)

HABITAT: Shelley and Whitehead describe this species as primarily a cove-inhabitant but that also occurs away from stream valleys and is often found in the residential areas of Blowing Rock and Boone

OBSERVATION_METHODS:

NATURAL HERITAGE PROGRAM RANKS: [GNR] [S2S3]

STATE PROTECTION:

COMMENTS: This is a narrowly distributed North Carolina endemic. Although it has fairly broad habitat requirements for a member of this genus, it should be considered of significant conservation concern due to its extremely small range.
