

An AMPHIBIAN Checklist for Hammocks Beach State Park 10 taxa

Herpetology is the branch of zoology dedicated to the study of amphibians (frogs, toads, salamanders, and newts) and of reptiles (snakes, lizards, turtles, and crocodilians). "Herps" are a diverse and interesting group of animals that are important elements in the fabric of life.

Amphibian is derived from the Greek work "amphibios". "Amphi" meaning 'both' and "bio" meaning 'life' - hence leading a double life. Indeed, most amphibians are aquatic as juveniles and breath with gills. After transformation, the adults usually live on land and most have lungs.

Many amphibians are very sensitive to environmental change. Their diversity and abundance can be an indication of an area's ecological health.

In early spring and during the summer listen for the calls of frogs and toads. Salamanders and newts, however, are silent and can be quiet secretive.

Reptiles, unlike amphibians, have dry skin covered with horny scales. Most, with the exception of snakes and legless lizards, have 4 legs with five clawed digits on each foot. While some amphibians retain gills as adults, all reptiles breathe solely by means of lungs.

Look for these cold-blooded animals on warm to hot sunny days when they bask on rocks, logs and tree trunks. Sixty-seven species have been recorded in North Carolina.

10 AMPHIBIAN taxa

PLETHODONTIDAE: [2]

- ___ Southern Two-lined Salamander - x - -
Eurycea cirrigera
- ___ Atlantic Coast Slimy Salamander - x - x
Plethodon chlorobryonis

HYLIDAE: [3]

- ___ Green Treefrog - x - -
Hyla cinerea
- ___ Squirrel Treefrog - x x -
Hyla squirella
- ___ Brimley's Chorus Frog - - - x
Pseudacris brimleyi

MICROHYLIDAE: [1]

- ___ Eastern Narrow-mouthed Toad - x - -
Gastrophryne carolinensis

BUFONIDAE: [1]

- ___ Southern Toad - x x -
Anaxyrus terrestris

HYLIDAE: [3]

- ___ Spring Peeper - - - x
Pseudacris crucifer

RANIDAE: [2]

- ___ American Bullfrog - x - -
Lithobates catesbeianus
- ___ Southern Leopard Frog - - x -
Lithobates sphenoccephalus
